

Looking for....
Innovative
Accounting graduates

Traditionally, accountants are anything but innovative. Unless you're talking about "innovative accounting".

But here at OutSmart360, we place great emphasis on being innovative, different, and standing out from the crowd in whatever we do. And our people are supported by a work-place that is driven by entrepreneurship at every level, where the focus is on being a professional, and a dynamic international environment where the only constant is learning every day.

We are on the search for young graduates, preferably from the commerce or management streams, who foresee a career in accounting and finance.

You will work closely with us and our international customers (across Europe and specifically Scandinavia) and support them in managing their financial and accounting projects. You will be in direct and constant touch with key client personnel and will work **only days**. You will also have access to the latest technology platforms and infrastructure to make work a breeze. And receive focused training all the way through to put you at the forefront.

Our Scholar program, a part of our career guidance system, will ensure you continue educating yourself and not lose sight of your overall career goals. Some of you will progress to become team-leaders and travel to global client-offices.

Email us with your resume at resume@outsmart360.com with **"Innovative Accountant"** as the subject line.
